Renovco
11355 Cote de Liesse
Dorval, Quebec, H9P 1B2

Hi Walter:

When this tragic disaster occurred I contacted Renovco at the same time I contacted the insurance company since I used Renovco in the past. Independently the insurance company had already selected Renovco to do the emergency clean-up and stabilization of the severely fire damaged house. What a coincidence.

Upon completion of the stabilisation work the task at hand was to demolish the house, except for the foundation, and then to rebuild it. After a few roadblocks from the city of Kirkland were overcome the demolition and subsequent rebuild started on 33 Marcel Meloche. The expected time it would take to complete the project upon receipt of the building permit was between three and four months.

As a result of the great support from the Renovco team the rebuild of the house is expected to be finished sooner than planned.

From what I have seen so far during my regular visits to the construction site I am very satisfied with the good workmanship, your team's recommendations on the inter design options, and their professionalism.

Your team did a good job and I would like to thank them for their efforts in this major renovation project.

Best Regards,

Roy Corbin
